Proteus Equipment

Handylift Hydraulic

Dependable products for demanding environments

Powerful

Take the strain out of lifting heavy manhole covers with a hydraulic lifter from Proteus. The 1.5 tonne breakout force enables a single person to tackle even the biggest covers quickly, safely, and with minimal fuss.

Versatile

Thanks to the massive range of keys and accessories available, coupled with various lifter sizes and specs, Proteus hydraulic lifters can tackle virtually any manhole cover with keyholes.

Reliable

Made in the UK with high quality materials and processes, our hydraulic lifters also have a big range of spares available from stock to ensure fantastic longevity.

Powerful 1,500kg breakout force to tackle stuck manhole covers with ease

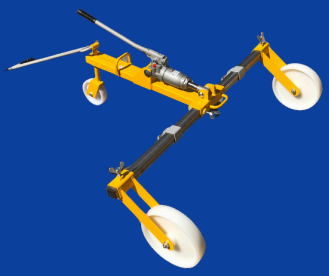

Various sizes and specs available to lift even the biggest manhole covers or pit lids

Made in the UK to uncompromising quality standards

Single-person operation for an efficient and safe lifting process

FEATURES

- Stainless steel 40mm thick beam
- Also available in 'Ultra Duty' spec with thicker 50mm beam, to avoid flexing on very heavy covers or wide spans
- Custom beam lengths available
- Quick and easy to assemble - simply slide the beam through the channel on the main body, slide the hook boxes and wheel assemblies onto the beam, and you're good to go
- Can be quickly disassembled into sections for easy storage
- Comprehensive range of spare parts, keys and accessories available
- Larger models available for bigger manhole covers

The Handylift Hydraulic is Proteus' best-selling and most versatile manhole cover lifter. It is light and easy to use, and with a **breakout force of 1.5 tonnes** it will enable anyone to lift even stuck manhole covers with minimal effort. With a massive array of keys and accessories available, it enables a **single user** to lift virtually any drain cover or pit lid with keyholes, including single piece sewer covers, split 'double-triangle' covers, block-paved covers with four keyholes, and Elkington Gatic style covers.

The lifter can be carried completely assembled in a van or can **disassembled quickly and easily** to fit into smaller spaces. We have supplied our manhole cover lifters to all major UK utility companies, councils, and thousands of other clients.

The standard model is capable of lifting covers up 900 x 900mm keyspan. For covers larger than this, we also stock the **Texas Hydraulic**, which is a physically larger version of the standard model, able to tackle covers up to 1200 x 1200mm keyspan.

If that is still not big enough, we can alter wheelspans and body length, and all models are also available in 'Ultra-Duty' spec, with a thicker steel beam to avoid flexing on very heavy covers or large spans. Even the **biggest covers** from Cubis or Elkington Gatic will be no problem for these lifters.

All our manhole lifters are **made in the UK**, and we have a comprehensive list of spare parts available.
