

# TOWABLE HOT BOXES

## Model HB2T

- 1.4m<sup>3</sup> capacity (approximately 2.5 tonnes of asphalt)
- 3.5 tonne GVW. Towing vehicle must be capable of this weight at a minimum
- Easy Burner technology with thermostatic heating control - simply set the desired temperature, and the burners will cycle on and off to maintain it, maximising fuel efficiency
- Our rental fleet means we need our units to be long-lasting, so we always focus on top quality construction and longevity
- Self-contained power system for gas heating - no need to use the vehicle's electrics, or for the hassle and added cost of batteries for heating
- Integral twin-axle bespoke Type Approved trailer chassis with LED lights on new units
- Optional platform/walkway on trailer for easier access to the lids and gas bottles (standard on hire units)
- Choice of ball or eye towing hitch
- Choice of paint colour if purchasing
- Runs off 2 x 19kg propane bottles
- Gas consumption typically around 0.2kg/hr
- Nationwide delivery available for hire and sales

## Model HB2TT

As above, but:

- Heavy-duty, double-action powered HARSH<sup>®</sup> tipping gear for increased convenience & safety
